

#### COLOUR MATCHING

- ☐ CMYK: 0 / 0 / 0 / 0  
PMS:  
☐ CMYK: 0 / 0 / 0 / 0  
PMS:  
☐ CMYK: 0 / 0 / 0 / 0  
PMS:

Colours can only be matched if Pantone (PMS) colours are supplied. Whilst we will do our best to match colours please note that printing on different media will result in colours appearing differently. There can be apparent differences due to the substrate material used across our range of products.

If you have PMS colours block the box with said colour and note the PMS colour number to the right of the box. If you have multiple PMS colours additional boxes should be added and we will colour match accordingly.

Additionally you can provide the CMYK breakdown and we will print as close as possible. Please do not include PMS and CMYK colours together.

#### HOW TO USE THIS TEMPLATE

Outline all strokes and fonts, to ensure these are preserved when sent through to us. If using software such as Adobe Illustrator, you can do this by selecting the entire artwork, then going to: Object > Path > Outline stroke.

To view artwork close to full (printed) size, please zoom in to 1200%. Due to the difference between printing inks, paint mixes and monitor displays, some colour variation might occur from what you see on your screen to the final printed product.

Add in any bitmap images you would like on your product. Images need to be 300dpi, they should not exceed this value significantly. All bitmap images must be embedded. In Adobe Illustrator LINKS PANEL > Embed Image(s). Save your design as an Adobe Illustrator PDF with (Adobe Illustrator default settings).

Add in all your text and logos and make sure they are kept within the Safe Print Area. This document contains 3 layers, as follows: Guidelines, Artwork, Footer and info. Work only on the Artwork layer. Deletes both Guidelines and Footer and info layers from this template.

Please note, on our stretch fabric products the printed design can be distorted slightly around the joins, corners, and shelving aspects of the internal frame. We do not recommend placing logos or important information outside of SAFE PRINT AREAS. Solid colours are best suited here.
