FTSE Women Leaders Review

Achieving Gender Balance

February 2022

The FTSE Women Leaders Review continues the incredibly important work, and success, of the Hampton-Alexander and Davies Reviews that came before it. Supported by Government and backed by business, continued reporting of progress across the FTSE 350 will be critical to driving action and improving gender balance in senior leadership.

The moral and business case for gender diversity is watertight. But the job is far from done. As we emerge from the pandemic, there's more that needs to be done to dismantle the barriers that prevent women rising to the top. Businesses have a vital role to play in achieving a more inclusive economy, where work enables all talent to progress.

Joint Ministerial Foreword

**The Rt Hon
Kwasi Kwarteng MP**

Secretary of State for Business,
Energy and Industrial Strategy

**The Rt Hon
Liz Truss MP**

Secretary of State for Foreign,
Commonwealth and Development
Affairs and Minister for Women
and Equalities

We would first like to thank and congratulate Denise Wilson, the distinguished members of the Review's Steering Group, and the secretariat. This is an excellent report, and a tribute to their dedication to advancing this important area of work, over the course of a number of years. We are delighted that the latest leadership data shows continued progress toward greater representation across the FTSE350, despite the extraordinary challenges faced by businesses during the pandemic. It demonstrates the success of the UK's voluntary, evidence, and business-led approach to improving business leadership diversity, which unlike the quota prescriptions of some other jurisdictions, works across a far larger number of companies.

The FTSE Women Leaders Review, and its predecessors, have inspired and empowered companies to remove barriers to women progressing to boards and executive leadership roles. This work is greatly appreciated by this Government, as part of our continued commitment to promoting equality of opportunity so everyone – whatever their background – can thrive and succeed on merit.

We want to ensure the UK leads the global economic recovery from the pandemic. GDP is back at pre-pandemic levels, and the UK is set to grow faster than any other G7 country this year. We must capitalise and build on this momentum.

Opaque networks can act as barriers to meritocracy, but when systems are open and recruitment processes transparent, we are more likely to see a talented and diverse workforce. It is clear that increasing representation can help ensure that we build back better and faster from Covid-19; this is why we're backing the next stage of the review, which raises aspirations by asking firms to strive for gender parity on their boards. Rather than mandating an exact balance at all times, this measure will act as a guide, so that neither gender is over-represented (more than 60%) nor under-represented (less than 40%) at board and senior leadership level.

We're confident that this ambitious new target will appeal to the competitive, goal-oriented nature of FTSE companies while ensuring the UK keeps pace with international developments. With research showing that companies who are approaching this ratio tend to be more profitable, doing all we can to maximise our use of talent pools, irrespective of gender seems more important than ever during this critical period of pandemic recovery.

We need the unique talent, ideas, and perspectives from women and men at a senior level, to fully fuel our economic growth. It is with this in mind – and inspired by the successes already found across the FTSE 350 – that the next stage of the Review will increase in its scope; reaching beyond the FTSE to invite the UK's top 50 private companies to share with us their progress against these same, market-led, targets.

The Review team has continued to strengthen the business and data transparency approach to increasing representation at the top levels of business. We're confident that FTSE firms will rise to this next set of challenges; keeping pressure on the accelerator toward achieving gender balance throughout the highest levels of British business.

The Next Stage

Denise Wilson OBE

Chief Executive
FTSE Women Leaders Review

I am delighted to welcome you to the first report from the FTSE Women Leaders Review, which is the third and successor phase of the UK's voluntary business-led framework to increase the number of women on FTSE 350 Boards and in their Leadership teams. The scope of the Review extends to 24,000 of the most senior roles in public listed companies, making the UK's drive for more women leaders, arguably the biggest and most ambitious of any country.

Today we are announcing four new Recommendations that set expectations and aspirational goals for this next, and anticipated final stage, of the FTSE Women Leaders Review. They build on the work of the former Hampton-Alexander & Davies Reviews, aiming to embed the progress and hard-won gains of the last decade, and take business further on its journey to achieving both gender-balanced Boards, and gender-balanced Leadership teams.

A lack of women in the boardroom was the original challenge and represents the area of greatest progress, but we need to achieve the same gains and more, for women in Leadership. While we continue to build on good practice from the earlier years, we need to firmly shift focus in this next phase to Leadership roles, and those at the top of the organisation, including the Chief Executive Officer roles where women remain few and far between.

There is no shortage of experienced, capable women, ambitious for themselves and their companies across all sectors of business today. Yet in a continuing theme, there is more work to do to ensure the opportunities are there too. The appointment rate today is significantly skewed in favour of men, with almost two out of every three available roles in the year going to men. This needs to change.

This report highlights the impact of Covid-19 in terms of virtual recruitment and the benefits of hybrid working and looks at sectors that have weathered the pandemic well finding increased opportunity, and others that have suffered significant setbacks. The challenges of the last two years have not impacted the workforce equally, and some of those most impacted include women. It has also brought into even sharper focus the systematic and known obstacles to improving women's representation in the workplace, especially for young parents, black and ethnic minority women, and those with caring responsibilities. Leaders now have an opportunity to act on this and accelerate change.

It is the unstinting efforts of business leaders, combined with ambitious targets and a rich data set, that have driven progress in the decade. As the conversation on gender equality in business deepens and strengthens each year, it is time now to energise a new generation of leaders who will pick up the baton going forward.

And finally, my thanks to our joint sponsors KPMG and Lloyds Banking Group for their commitment and generosity. A special mention to Ishbel Maclean on secondment from Lloyds Banking Group, to Rachel Askew-Sammut and Felix Bunting who have gone the extra mile, and our wonderful teams at the Department of BEIS and the Government Equalities Office for their hard work, dedication and guidance. And of course, our sincere thanks to the Ministers for their continued support and our Steering Group members for their loyalty and exemplary leadership in delivering this next stage.

A Word from our Sponsors

Bina Mehta MBE
Chair
KPMG UK

We know that the collective and sustained focus on greater representation of women on FTSE 100 boards and leadership roles in recent years has delivered real and lasting change.

In the KPMG-sponsored Hampton-Alexander review, which concluded last year, we were incredibly proud that this spotlight led to achieving the target for 33% of women on FTSE boards.

Now, as a co-sponsor of the FTSE Women Leaders Review alongside Lloyds Banking Group, we want to maintain that momentum, with a relentless focus on improving further the representation of women on boards as well as leadership positions.

While companies have made great progress towards creating inclusive workplaces where everyone can thrive, the job is far from complete. Structural and cultural barriers still exist for women and other historically under-represented groups. This will require a sharp and deliberate focus on how businesses recruit, retain and progress their people at all levels.

It's clear that the focus on the representation of women has opened up the floor to broader action on other facets of diversity, such as ethnicity or socio-economic background. This will guide the way to achieving true equality.

I am proud to lead a diverse board at KPMG and I see the benefits of this every day. Over half of our board and 43% of our executive team are women, but we know we still have more to do. Challenging ourselves on creating pathways, opening up opportunities and embedding an inclusive environment is the foundation for continued change.

Organisations that make inclusion, diversity and equity central to their business strategy have a competitive advantage. It is good for business as well as being good for society. Those that don't act and put change agendas in place will be missing out on the growth opportunities that exist.

Robin Budenberg CBE
Chair
Lloyds Banking Group Plc

Huge progress has been made by UK business over the course of the Hampton-Alexander Review. The focus on voluntary, business led targets, and the benefits that Boards have gained from greater diversity of thought, have transformed gender balance on Boards and steady progress has been made at Leadership level.

While this is significant, more needs to be done to cement the culture change required to deliver true gender balance. I am therefore delighted that Lloyds Banking Group is co-sponsor of the new FTSE Women Leaders Review, alongside KPMG, and welcome the new target to achieve a minimum of 40% women on Boards and in Leadership teams.

The goal is ambitious, but provides the necessary focus to remove the barriers to progression that still exist. I'm particularly pleased that as well as continuing to build on the success of more women on boards, there will be a strong focus in the Review on increasing the number of women in leadership positions. There are more than enough talented women. We need to ensure the opportunities are there too.

In my view, women are more likely to want to be part of an organisation if they see women at the top. At Lloyds Banking Group, women make up 40% of our Board and 34% of our leadership population. But we have much more to do and have set new aspirations of 50% women and 13% Black, Asian and Minority Ethnic colleagues in senior roles by 2025. And our Board will mirror those ambitions.

Diversity around both the Board and Executive table is a source of real competitive advantage and true diversity has many different components. The real test is how that diversity is empowered to make a difference. With the launch of the FTSE Women Leaders Review, we have the opportunity to position the UK as one of the most progressive countries with regard to diversity in business, and I look forward to us playing our part to make gender balance a reality.

1. Executive Summary

Another strong year of progress for women on FTSE 350 Boards and continued good progress for women in Leadership teams. The rich and unique data set grows each year, as does the effort and ambition of many companies working hard and pushing beyond the targets set in earlier years.

This is the first year of the FTSE Women Leaders Review, which is the third and successor phase to the Hampton-Alexander and Davies Reviews. It is an independent, voluntary and business-led initiative supported by Government, aimed at increasing the representation of women on FTSE 350 Boards and in their Leadership teams.

The Recommendations

The four new Recommendations below build on the work and progress of the last decade. They set expectations and aspirational goals for this next, and anticipated final stage in the journey to gender-balanced Boards and Leadership teams by the end of 2025.

- Increased voluntary target for FTSE 350 Boards, and for FTSE 350 Leadership teams to a minimum of 40% women, by the end of 2025.
- FTSE 350 companies to have at least one woman in the Chair or Senior Independent Director role on the Board, and/or one woman in the Chief Executive or Finance Director role in the company, by the end of 2025.
- Key stakeholders to set best-practice guidance, or have mechanisms in place to encourage FTSE 350 Boards that have not achieved the prior 33% target, to do so.
- The scope of the Review is extended to include the largest 50 private companies in the UK by sales.

Women in Leadership

Executive Committee & Direct Reports

The **FTSE 100** has made steady progress again this year, with the number of women in the Combined Executive Committee & Direct Reports increasing to **32.5%**, up from 30.6% last year.

The total number of roles in the population has increased in the year, with the number of women on the Executive Committee remaining largely flat, and stronger progress made in the Direct Reports population.

The companies that started to address the shortfall of women in Leadership many years ago, continue to lead the way. There are 44 FTSE 100 companies that have met, or exceeded the 33% target from the prior Hampton-Alexander Review, including 15 companies with 40%, or more women in their Leadership teams.

The **FTSE 250** similarly has made good progress again this year, with the number of women in the Combined Executive Committee & Direct Reports increasing to **30.7%**, up from 28.5% last year. The total number of roles in the population has increased in the year, with good growth in both the number of women on the Executive Committee and in the Direct Reports population.

The key drivers of progress are turnover and the appointment rate of women over men. Across the FTSE 350 Leadership population the turnover has dropped to around 22%, reducing the available opportunities in the year. The appointment rate of women remains low in a continuing theme, at just 38% and almost two out of every three roles going to men.

The number of women in the very top job, that is the CEO remains flat and stubbornly low, and there is much more to do on Executive Committees, and in some key functional roles, in particular the Finance Director and the Chief Information Officer.

The number of All-Male Executive Committees in the FTSE 350 has reduced again this year to just 16, down from 54 in 2017.

Although the drive to increase women in Leadership started later than the focus on boards, it is clear a robust and re-doubling of effort is needed to increase the gender balance further.

Women on Boards

The **FTSE 100** has again made good progress during the year, with women's representation now standing at **39.1%**, up from 36.2% at the beginning of 2021.

On an individual company basis 85 FTSE 100 boards have met, or exceeded the prior 33% target, and almost half of all FTSE 100 companies now have 40% or more women on their board.

The **FTSE 250** has similarly made good progress during the year, with women's representation now standing at **36.8%**, up from 33.2% at the beginning of 2021.

Almost 200 boards (77%) have met, or exceeded the prior 33% target, and 92 FTSE 250 companies now have 40%, or more women on their board.

The number of women in the most senior board roles continues to increase, with 48 women Chairs and 115 women occupying the Senior Independent Director role. Almost half of all **FTSE 350** Boards now have a woman in either the Chair, or Senior Independent Director roles. The number of 'tokenistic' 'One & Done' Boards has markedly reduced again this year to a remaining six, down from 74 at the end of 2018.

The UK ranks higher than ever this year when compared internationally, with the FTSE 100 in second place behind France. The UK voluntary business-led approach is not only working, but also provides a clear and encouraging model for those countries just beginning their journey.

FTSE Women Leaders

Next Steps

Progress comes in many forms, statistics aside, and the debate on gender equality in business changes subtly and deepens each year. In 2021 it was all about culture, a focus on inclusion, transparency and honest conversations. That looks set to continue.

For a new generation of leaders picking up the baton in this next phase, gender balance will be the goal. And we know there is much more to do, particularly for women in Leadership roles and in the very top jobs. However, the progress and learnings from previous years will provide the momentum and the route map.

The bigger gains are yet to come, in building a truly inclusive workplace culture, where everyone irrespective of gender, ethnicity or background, can thrive and give their best.

2. The Recommendations

The four Recommendations below build on the work of the former Hampton-Alexander and Davies Reviews. They set expectations and aspirational goals for this next, and anticipated final stage in the journey to gender-balanced Boards, and gender-balanced Leadership teams by the end of 2025.

01

Increased Target Aiming for Gender Balance

Recommendation: The voluntary target for FTSE 350 Boards, and for FTSE 350 Leadership teams is increased to a minimum of 40% women’s representation, by the end of 2025.

To maintain gender balance over time, and provide a degree of flexibility, companies should aim to maintain the representation of both men and of women at, or above a minimum 40% threshold.

Rationale: Voluntary targets that are realistic but stretching have been pivotal to improving women’s representation in the UK. They encourage accountability, a data-driven approach and help focus on succession and the pipeline of talent further down in the organisation. The year-on-year progress achieved in the UK over a relatively short period of time, and the strong pipeline of experienced, capable women, is evidence that a more ambitious target than 33% could be met.

02

Women in the Most Senior Board and Leadership Roles

Recommendation: FTSE 350 companies should have at least one woman in the Chair or Senior Independent Director role on the Board, and/or one woman in the Chief Executive Officer or Finance Director Role in the company by the end of 2025.

All companies should increase their efforts to understand and remove bias from the selection process on Board and Leadership appointments.

Rationale: The number of women in FTSE 350 Chair and SID roles has increased every year since 2016, with women currently occupying around 14% of Chair roles and 32% of the Senior Independent Director roles. Women in the Chief Executive role remain few and far between, with virtually no progress in a decade. The number of women Financial Directors currently stands at 18% and has likewise made little progress.

However, women make up over one third of FTSE 350 board members, with many having served on several boards and for a number of years. In addition, given the ever-strengthening pipeline of experienced women in leadership, many more women should have been appointed to the highest roles than seen at present.

03

Locking in Progress on FTSE 350 Boards

Recommendation: Key stakeholders, such as the Investment community and corporate governance agencies should continue to set best-practice guidance, or have in place alternative mechanisms as appropriate, to encourage any FTSE 350 board that has not yet achieved the 33% target for 2020, to do so.

In addition, FTSE 350 Boards below 33% women, should look to the under-represented gender when considering additional appointments.

Rationale: The Investment community are increasingly adopting policies or engagement practices to align with the 33% minimum threshold, or similar. Almost two-thirds of FTSE 350 Boards have stepped up in the last decade and already met, or exceeded the 33% target. However, too many boards have made little progress and still have a long way to go to achieve the 2020 target.

A challenge of the UK’s voluntary, business-led approach is how to encourage companies slow to act, or who slip back under new leadership, and remain adrift from previous targets. To improve UK corporate governance in the round, and for the business-led framework to be a long term success, all companies need to challenge existing mindsets and practices, and play their part.

04

Encouraging Progress Across a Wider Spectrum of British Business

Recommendation: The scope is extended beyond FTSE 350 companies to include the largest 50 private companies in the UK by sales. This will provide consistency of regulatory approach and drive further progress across British business.

Note: Private companies includes, private equity owned companies, partnerships, entrepreneur/founder owned, family owned or companies owned directly by management and staff.

Rationale: Almost one million people are employed in the UK’s top 100 private companies, which generated £237 bn. sales in 2020. In the context of the broader 'Audit & Corporate Governance Reform Package' and this third phase of the Review, there is benefit in extending the scope to include the largest non-listed companies. This would help strengthen the regulatory approach, as well as bringing diversity expectations in the leadership of large private companies in line with public listed companies, and encourage further progress across British business.

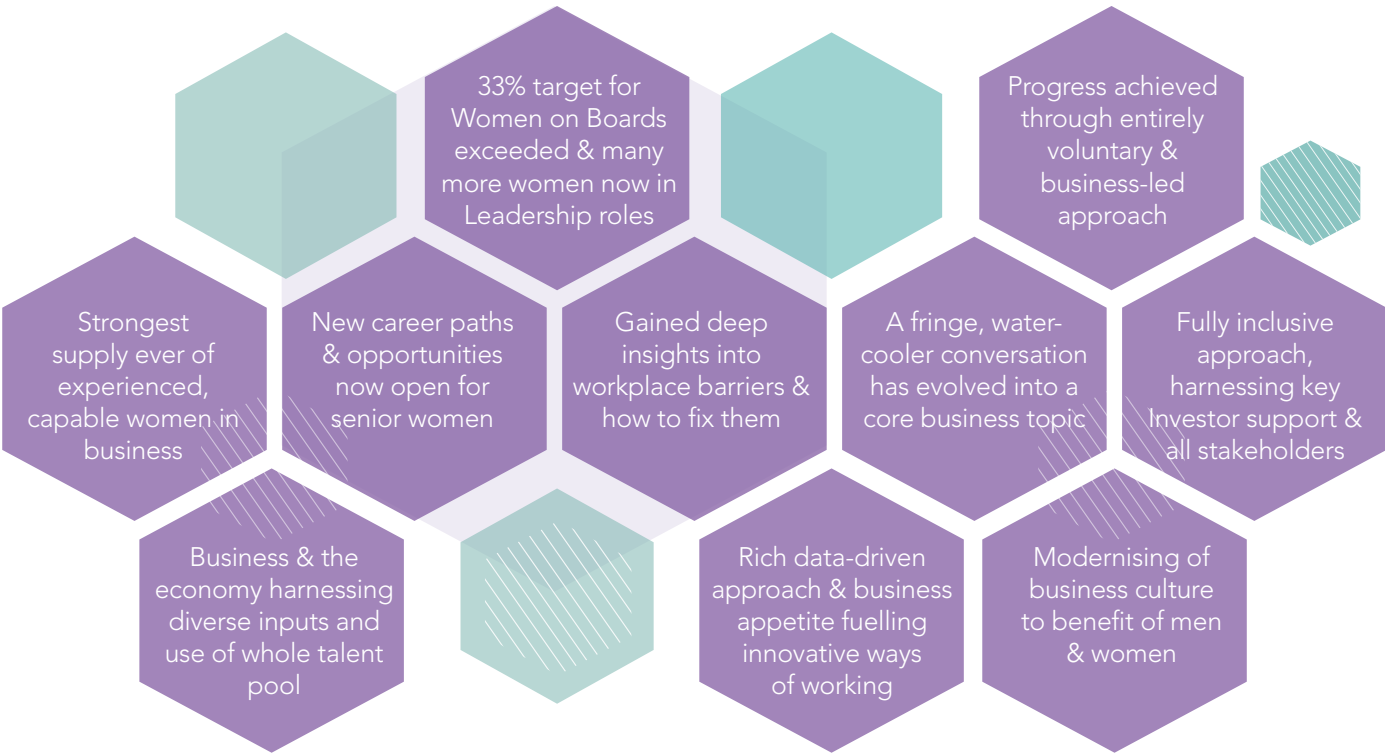

The benefits of diverse teams are well understood, and I am encouraged by the progress made in the past decade. However, we are still a long way from seeing gender parity at board and senior leadership levels. I would like to see greater focus on the cultural factors that can hamper the retention and promotion of women employees.

As investors, we have a responsibility to advocate for greater diversity in our investee companies through engagement and using our voting power. But for this to be credible, we also need to live up to those values in our own industry.

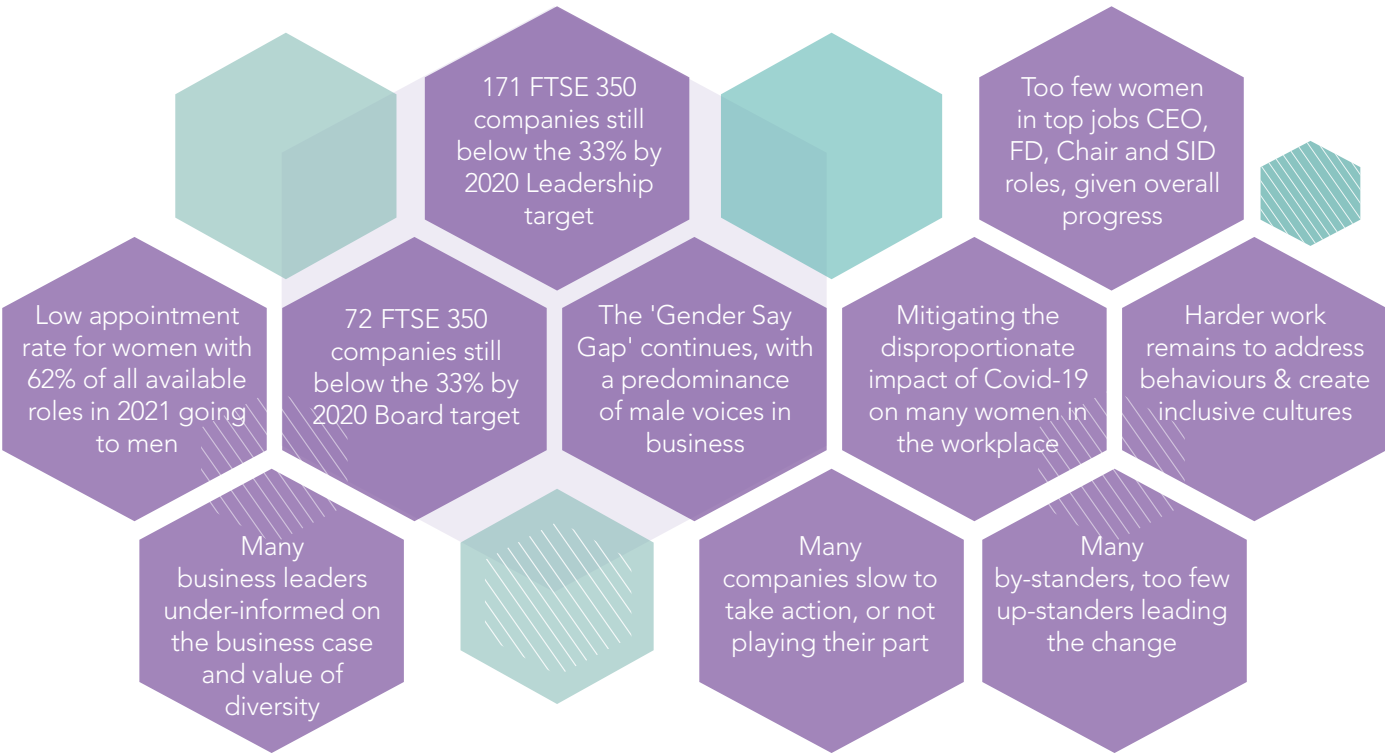

Mark Versey
CEO
Aviva Investors

Progress comes in many forms...

... but still more work to do

3. Executive Committee & Direct Reports

FTSE 100 Progress 2021

The FTSE 100 has made steady progress this year¹, with almost a thousand more women in Leadership, than in 2017. However, the rate of progress overall remains slow, with a lower turnover in the year and 63% of all available roles going to men.

The representation of women in Leadership, that is the Combined Executive Committee & Direct Reports, has risen to **32.5%** from 30.6% last year, with faster progress in the Direct Reports.

The total number of positions has increased in the year by just over 400 to 9415, as has the average size of the Executive Committee & Direct Report population. This has increased to 96 roles, up from 92 last year.

The turnover rate at 24% has returned to more normal levels following a spike last year, with very similar leaving rates for women and men.

The other key driver of progress is the appointment rate, which continues to be significantly skewed in favour of men. Almost two out of every three roles that become available in FTSE 100 Leadership during the year that is 63%, are still going to men. This remains difficult to reconcile given the strong supply of experienced, capable women in business today.

The Highs

Meanwhile, many companies have been working hard over a number of years, and are now reaping the benefits of women in Leadership roles.

Next Plc with 55% women and Burberry Group Plc with 53.7%, take the top two slots in the Top Ten Best Performers list for women in Leadership, for a fourth consecutive year.

Amongst others, Pearson Plc, J Sainsbury Plc and London Stock Exchange Group Plc all saw strong gains in the year, increasing their representation of women in Leadership by 8.5 percentage points or more.

Top Ten Best Performers

	Company	Combined Executive Comm & DRs	Sector
1	Next Plc	55%	Retail
2	Burberry Group Plc	53.7%	Consumer Products & Services
3	Pearson Plc	49.5%	Media
4	J Sainsbury Plc	47.8%	Personal Care, Drug & Grocery Stores
5	ITV Plc	47.5%	Media
6	Whitbread Plc	45.5%	Travel & Leisure
7	London Stock Exchange Group Plc	44.5%	Financial Services
8	AstraZeneca Plc	43.5%	Health Care
9	WPP Plc	42.9%	Media
10	B&M European Value Retail S.A.	42.9%	Retail

The threshold required to feature here in the 'Top Ten' has increased to almost 43%, compared to just 35.7% in 2017.

Additionally, BHP Plc, Berkeley Group Holdings Plc, Persimmon Plc, CRH Plc and Glencore Plc are amongst those most improved this year.

The complete FTSE 100 Company Ranking can be found on page 48.

Drivers of Progress	2017	2018	2019	2020	2021
Appointment Rate of Women	Up from 32%	35%	36%	36%	37%

FTSE 100 Executive Committee

FTSE 100 Direct Reports

FTSE 100 Combined Executive Committee & Direct Reports

2. There are 98 companies only in scope, excluding two Investment Trusts which have no employees to declare

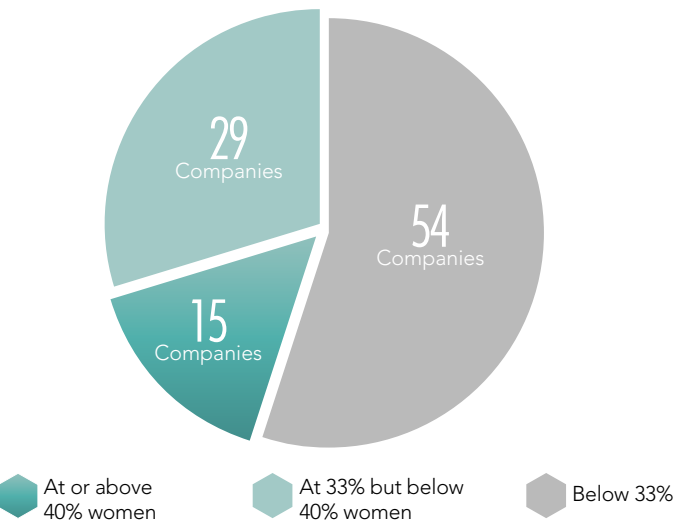

3. Executive Committee & Direct Reports

FTSE 100 Progress 2021

There are now 44 companies in the FTSE 100 that have reached, or exceeded the 33% target, which was set under the Hampton-Alexander Review to be achieved by the end of 2020. There are 15 companies that have met the latest 40% target, most of which started to address the shortfall of women in Leadership several years ago, and continue to lead the way.

Although the majority of FTSE 100 companies have made progress during the year, 54 companies, just over half are still below the former 33% by 2020 target. Several companies have only recently begun their efforts in earnest, and are now working hard to harness the skills of women, while others continue to make little progress.

FTSE 100³ Companies Already Achieving 40%

The Lows...

In a sign of progress, the entry threshold for the Top Ten Poorest Performers table increases each year. The range for this year being between 14.7% and 20.7%, compared to the range in 2017, which was between 9.3% and 13.4%. The effect is that companies, such as Ferguson, Smiths Group or DCC, standing still, or falling slightly back, can find themselves as unexpected entries.

The list of Top Ten Poorest Performers - and those with the most to do - is again largely unchanged from last year. Ashtead Group and Fresnillo Plc have both featured for five years running, Glencore Plc for four years and 3i Group and Antofagasta Plc for three years running.

However, mining sector related Glencore, Fresnillo and Antofagasta have all improved by around 5 percentage points in the year, with Financial Services, Intermediate Capital and 3i Group both falling back.

Top Ten Poorest Performers

	Company	Combined Executive Comm & DRs	Sector
1	Ashtead Group Plc	14.7%	Industrial Goods & Services
2	Intermediate Capital Group Plc	15.2%	Financial Services
3	Fresnillo Plc	16%	Basic Resources
4	3i Group Plc	16.7%	Financial Services
5	Glencore Plc	17.8%	Basic Resources
6	Meggitt Plc	18.2%	Industrial Goods & Services
7	Antofagasta Plc	18.5%	Basic Resources
8	Ferguson Plc	19.8%	Industrial Goods & Services
9	DCC Plc	20.7%	Industrial Goods & Services
10	Smiths Group Plc	20.7%	Industrial Goods & Services

From 12 All-Male Executive Committees in the FTSE 100 in 2016, there remain only two going forward. Fresnillo Plc for a fourth year, and Spirax-Sarco Engineering for a third year running. Rolls-Royce have recently announced the appointment of two women to their Executive Committee⁴.

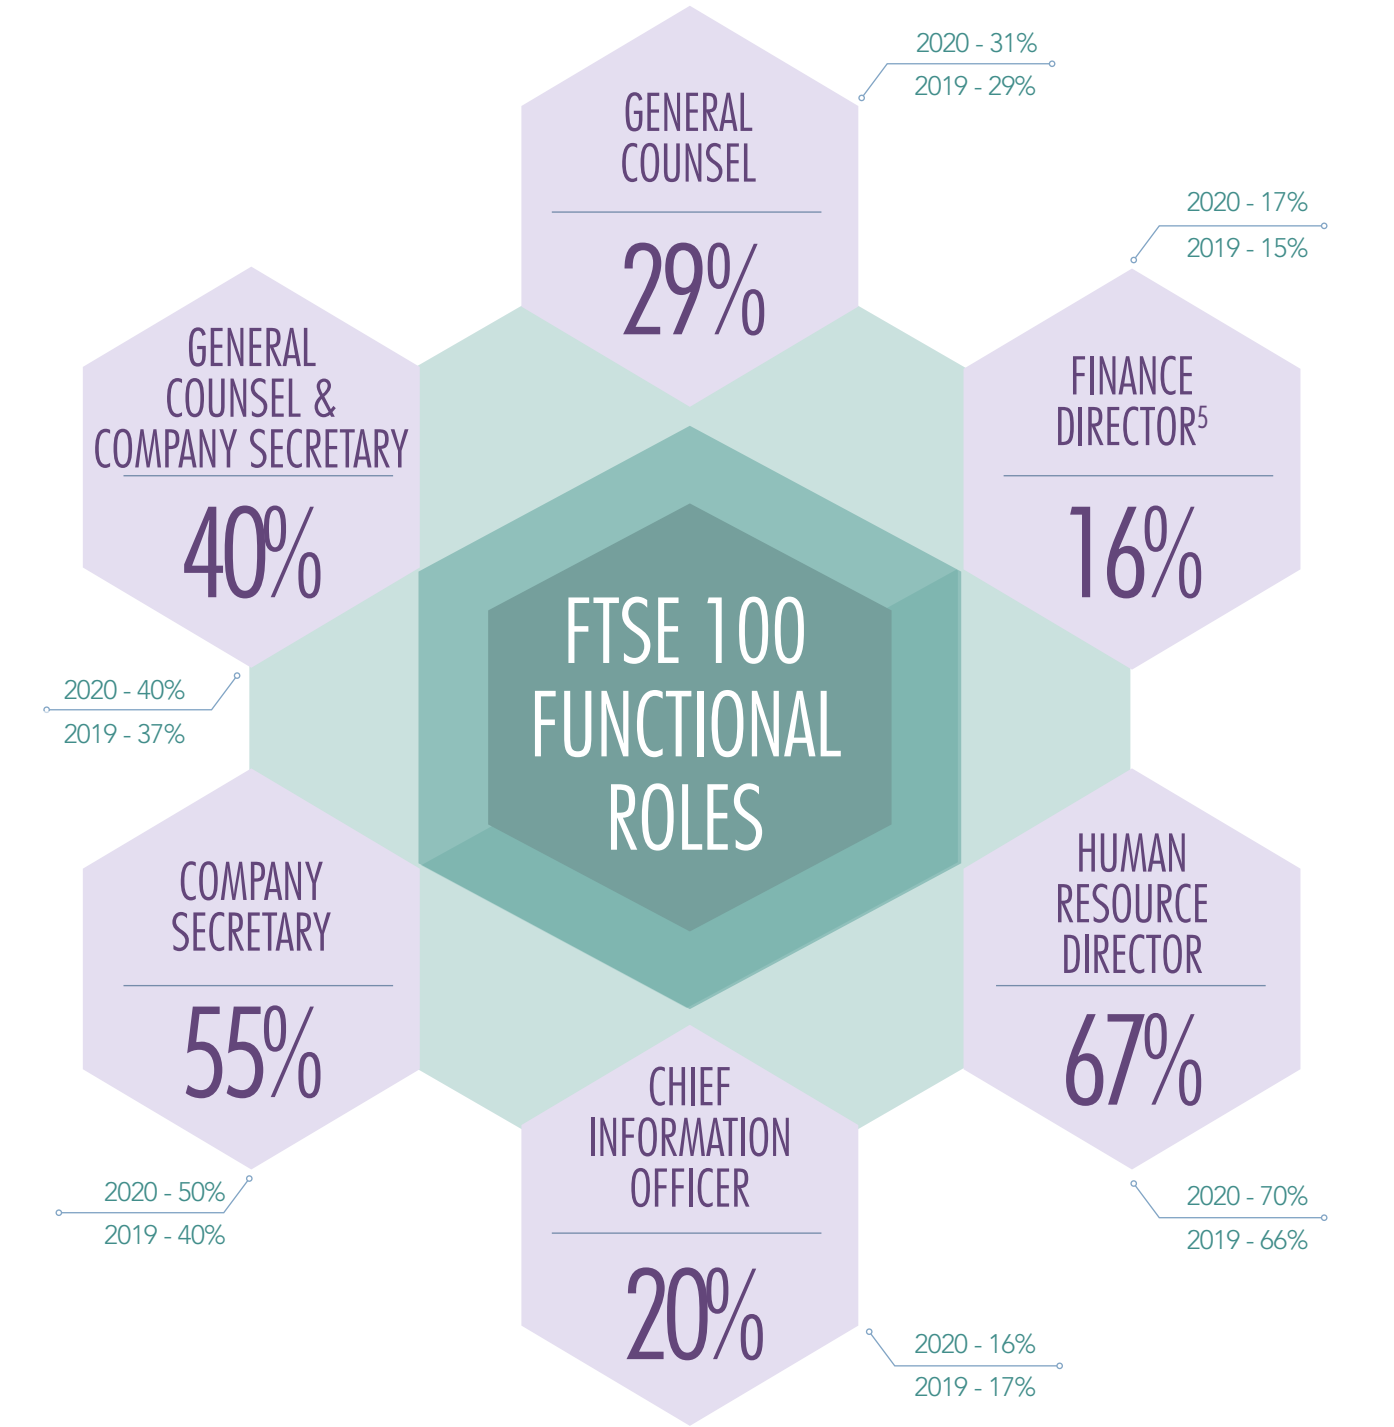

All-Male Executive Committees	
Rolls-Royce Holdings Plc	10 Men
Spirax-Sarco Engineering Plc	7 Men
Fresnillo Plc	4 Men

Additional women appointments announced recently

3. There are only 98 companies in the FTSE 100 in scope, excluding two Investment Trusts, which have no employees to declare.
4. Rolls Royce Holdings Plc announced the appointment of two women, one as CTO and another as Chief People Officer, who joined the Executive Committee in November 2021 and January 2022 respectively.

Women in Functional Roles

Women in key, decision-making roles are now commonplace. The representation of women Chief Information Officers, and Company Secretaries in FTSE 100 companies increased during 2021, countered by a marginal dip in the General Counsel and Finance Director roles, and Human Resource Directors where women tend to dominate.

5. Source: BoardEx 10th January 2022, and other public and/or statutory sources.

Pascal Soriot
Chief Executive Officer
AstraZeneca Plc

Inclusion and diversity is fundamental to our success as an organisation. As a global, science-led, patient-focused pharmaceutical company, we are tireless in the pursuit of delivering life-changing medicines to patients, and our team of more than 80,000 people worldwide push the boundaries of science every day. That has never been more apparent than during the COVID-19 pandemic, as we've delivered our vaccine and long-acting antibody to patients all over the world.

This kind of ground-breaking work would not be possible without a diverse workforce who feel empowered to challenge the status quo. At AstraZeneca, we therefore place great importance on nurturing an inclusive environment where people feel valued and able to be their authentic selves.

I believe that innovation only occurs when people feel safe to offer alternative perspectives, when those ideas are welcomed and valued, and when challenging conventional thinking is part of everyday life. Creating an inclusive culture and building a diverse workforce is consequently a strategic priority for us and it's why I chair our Global Inclusion & Diversity Council and oversee the delivery of our commitments.

One such commitment is to gender equality and I'm proud to work alongside a global workforce of which over half are women, and where the number of women in senior roles across our organisation continues to increase. In 2021, women represented 44% of our Leadership team and two more women joined our Senior Executive Team, making five of its twelve members women.

If we are to continue to drive progress, we must review and be transparent about our diversity performance. In this regard, independent bodies such as the FTSE Women Leaders Review are doing invaluable work to advance gender equality across all industries.

I will never be complacent when it comes to our commitment to gender equality as a crucial part of ensuring that AstraZeneca is fully inclusive and diverse. It's also central to driving the innovation the world needs to make an even bigger difference to the lives of patients and society.

Milena De Focatis
Chief Executive Officer
Admiral Group Plc

'People who like what they do, do it better' – a quote from Henry Engelhardt our founder. This belief is the core of Admiral's culture and philosophy and is on the wall in our office entrance. And we believe that people will only like what they do if they feel appreciated for who they are, and genuinely feel they will be given the chance to do even more.

It's why inclusion has always been at the heart of Admiral's culture. It is my opinion that inclusion drives diversity, more than the other way around. And inclusion for all, can't exist without equality. And equality is one of the four pillars on which the Group culture was built almost thirty years ago.

When I joined 15 years ago, I was one of five CEOs leading international businesses and four of us were women. I am just one of many examples of women with great careers at Admiral who had not felt pushed to make a choice between a career or family.

Today, we have a 50/50 gender split both on our Board and Executive team and we've been named the second-best company to work for women by the Great Place to Work® Institute. But we know we can't rest on our laurels. There is so much more to do.

We continue to monitor whether our colleagues feel treated fairly, regardless of their gender, ethnicity, or sexual orientation (as of today ~95% of them do...5% more to go) and try to improve our recruitment, talent and career development policies, to become a better place to work for everybody.

Of course, this is great for our people; it's also great for our businesses as it means we attract and retain new diverse talent and make better and more solid decisions.

It's good to see business truly embracing this social and economic imperative, and the willingness to learn from each other. We are in the privileged position to provide talented women around the globe with very different role models to the ones many of us, including me, grew up with - changing the perception of what is possible, supporting bigger ambitions and inspiring everyone in doing so.

3. Executive Committee & Direct Reports

FTSE 250 Progress 2021

The FTSE 250 has made steady progress this year⁶, following a relatively flat year in 2020. The number of women on both the Executive Committee and Direct Reports populations has increased by almost 400 this year, despite 62% of all available roles going to men.

The representation of women in Leadership, that is the Combined Executive Committee & Direct Reports, has risen to **30.7%** from 28.5% last year, with slightly more progress on the Executive Committee.

The total number of roles has increased by over 400 during the year to 11848. The average size of the Executive Committee remains unchanged at 10 roles, very similar to the FTSE 100. Whereas the average size of Direct Report population, has increased to 56, from 53 last year, and is still relatively small compared to the FTSE 100.

The turnover rate has reduced to 20% in the year, and is closer to that seen in earlier years. However, the appointment rate is the other key driver of progress and this remains low and continues to be significantly skewed in favour of men. In a not unfamiliar theme, almost two out of every three roles that become available in FTSE 250 Leadership during the year, that is 62% are still going to men. This is again difficult to reconcile given the cohort of experienced women in senior management today.

The Highs

Shaftesbury Plc take the number one slot in the Top Ten Best Performers table for the fifth year running. They are followed by Law Debenture Corporation Plc in second place and in the Top Ten for the third year running. New entry Spire Healthcare takes third place, with 4imprint Group Plc in fourth place, having featured in the table now for two consecutive years.

It is a sign of progress also that many different business sectors across the FTSE 250 Index are represented here.

Drivers of Progress	2017	2018	2019	2020	2021
Appointment Rate of Women	Up from 28%	30%	35%	34%	38%

3. Executive Committee & Direct Reports

FTSE 250 Progress 2021

There are now 65 companies in the FTSE 250 that have reached, or exceeded the 33% target, which was set under the Hampton-Alexander Review to be achieved by the end of 2020. Of the 30 companies that have already met the latest 40% target, most started to address the shortfall of women in Leadership several years ago, and continue to lead the way.

FTSE 250¹⁰ Companies Already Achieving 40%

Although the majority of companies have made progress during the year, there remain 116 FTSE 250 companies still below the previous 33% target. Several companies have only recently taken action, recognising the progression of women in work, especially in Leadership, as a core and strategic business issue. In addition, it is one of increasing interest to Investors, customers, not to mention women themselves and the younger workplace demographic.

The Lows...

The entry level criteria for the Top Ten Poorest Performers table remains similar this year at 16.7%. Both Hochschild Mining and Hill & Smith Holdings have dipped slightly during the year, occupying the top two slots again this year, and having appeared in the Poorest Performers table for four consecutive years. Clarkson Plc and Ferrexpo Plc are the only companies in the table to have made any real progress this year.

The number of All-Male Executive Committees continues to decrease, with only 13 companies remaining, two of which are new entries to the FTSE 250 Index in 2021. In a real sign of progress, companies with All-Male Executive Committees, once very common, are down by ten in the year, from a surprising 47 companies in 2017.

3. Executive Committee & Direct Reports

The Next Phase

The rich and robust data set continues to build each year and has undoubtedly been one of the main drivers of progress across the FTSE 350. It shows in detail how far each individual company has come, comparisons with peers and across sectors, and where the gaps remain.

Those Most Improved

Those most improved companies in the year are to be commended for progress, despite several having some way to go. Amongst those companies seeing the biggest improvements in the proportion of women in their Leadership teams are FTSE 100 BHP Group, increasing over 12 percentage points and close to the new 40% target, and Berkeley Group Holdings increasing by over 11 percentage points in the year.

FTSE 250 CLS Holdings and Great Portland Estates saw increases of over 20 percentage points in the number of women in their Leadership teams, as did Playtech increasing by just over 17 percentage points.

Those Falling Back

An important factor in opting for the voluntary business-led approach, over legislative quotas and penalties, was it encouraged potentially slower, but ultimately more enduring and sustainable change. A regime that built a strong business-case, required influence, learning and curiosity, would pay dividends over a tick-box compliance approach.

Hence, those companies that have fallen back in the year are worthy of a mention, support and encouragement too. Those falling back the most include Tritax Big Box, Sirius Real Estate, Dominos Pizza and Coats Group. All had met the 33% target at the end of 2020, and have since fallen below.

A Sector View

A new, rich and unique data set has emerged in the last decade, not just on the representation of women in leadership and board roles, but on the turnover and their appointment rates relative to men in any one year. In addition, a sector perspective has also emerged, which has in equal measure both validated and challenged expectations.

The sectors which have the strongest representation of women in Leadership are unsurprisingly the Media and Retail sectors, followed by Health Care, Real Estate and Consumer Products & Services.

Those with the poorest representation of women in Leadership as might be expected, are sectors based on mining, construction and industrial activities.

However, there are leaders and laggards in every sector, with BHP Group Plc and Marshalls Plc as stand-out performers in their respective sectors with 39.4% and 31.3% women in Leadership respectively.

Companies at the forefront of progress have been generous in sharing lessons, best practice examples, and innovations regarding the retention and promotion of talented women. The shared learnings have been sometimes sector specific, but more frequently are of generic relevance and widely shared across many sectors.

The Recommendations

The Recommendations for this next, and anticipated final stage, build on the work of the former Davies and Hampton-Alexander Reviews. They are intended to embed progress and hard-won gains of the last decade, and take business further on their journey to gender-balanced Leadership teams. They will also shift the focus to the appointment rate of women leaders, in particular, to the Chair, SID, Chief Executive and Finance Director roles, and encourage all companies to play their part.

Additionally, the Recommendations will increase the impact of the Review and its 'ripple effect' across British business, encompassing not only 350 public listed companies, but some of the largest private companies too.

Outlook

The business-led, voluntary approach has worked well for UK business, with significant gains already achieved.

The pipeline of capable, experienced women has never been stronger, nor has the appetite from business for change been healthier. Most of the challenges are known ones, are out on the table and increasingly well understood. However, it will take a further period of sustained work to see women routinely, and more equally take their seats at the top of British business.

Natasha Adams
Chief People Officer
Tesco Plc

Thinking back to nearly two years ago, when we were just starting to see the impact of the pandemic, we had no idea how much we would need to adapt and change. I am still in awe of what my brilliant colleagues achieved and the incredible women at Tesco who were so important in all aspects of our response, from quick decision-making, to serving the nation.

As the crisis emerged, we saw changes in customer behaviour before society recognised there was a pandemic. 52% of Tesco frontline are women, and every single person stepped up, putting their own fears aside to serve others. We needed to respond quickly on many levels and set our four key priorities: provide food for all, safety for everyone, support for colleagues and support for communities.

Our focus was the welfare, wellbeing and safety of our colleagues. We introduced market-leading measures in a matter of days, including paid leave for all COVID-19 related absence, the introduction of school closure leave and parental leave from the start, recognising that many of our colleagues are working parents.

We asked all our clinically vulnerable colleagues to stay at home for at least 14 weeks on full pay, ensured that any pregnant colleagues were also at home on

paid absence and adapted maternity pay calculations for those already on maternity leave, to ensure no one was disadvantaged.

Despite a workforce of 300,000 colleagues nationwide, we watched absence rates increase and it became obvious we needed more colleagues to keep stores and distribution centres running. In just over two weeks, the organisation mobilised to recruit 50,000 new temporary colleagues, streamlining recruitment and training to ensure that only the vital steps were taken, and everyone was kept safe.

In addition to physical health, mental health and wellbeing of colleagues also became a top priority. The pandemic uncertainty brought greater levels of stress for many, particularly to those with caring responsibilities. We offered free access to Headspace and Silvercloud and held webinars on key topics such as grief, and working at home with caring responsibilities. And of course, we kept listening.

We are still managing the impact of the pandemic, but I feel very lucky to be surrounded by amazing women who go above and beyond every day as colleagues, friends, mothers, sisters, daughters, and partners. These women are at the heart of Tesco and we're so grateful for that.

3. The Pandemic & Impact on Women's Progression

An overview of the effects of the pandemic on women's careers

The last two years have seen significant disruption across all sectors of the UK economy and women have been disproportionately impacted both personally and professionally. It is women who make up the majority of the workforce in the most hard-hit sectors and have borne the pressures of additional caring responsibilities. However, progress in women's representation at Leadership level continues across FTSE 350 companies.

Women make up the majority of affected sectors

It is important to look at sectors when trying to understand the impact that the pandemic has had on women's careers. Across the UK, the hospitality, retail and travel sectors were subject to significant disruption. As women make up 60-70% of the hospitality and retail sectors, the closure of these industries resulted in mass furlough and redundancies of women across the UK, which in part explains why more women than men were furloughed during the pandemic.

In some sectors, such as hospitality, women have been more likely to work in areas of the business that have seen significant impact to profits, which makes them easy targets for redundancy when the purse strings are squeezed. Similar trends have been seen in the retail sector, where men tend to occupy the most critical functional roles, leaving senior women at risk of being more expendable.

Balancing work and caring responsibilities

As women are more likely to care for young children and elderly relatives at the same time, the intensified pressure of the pandemic created a challenging balancing act between work and home responsibilities. Research showed 28% of women in the UK reported an increase in domestic caring responsibilities due to the pandemic (vs. 16% men). It has also been highlighted that parents and carers working from home were less likely to do so under conditions conducive to high productivity. The impact this has had on women's careers needs to be addressed.

Furthermore, the pressures have resulted in women leaving the workforce, which if left unchecked, could reverse progress made in recent years.

Progress continues at senior Leadership level

Despite these challenges, data collected as part of the FTSE Women Leaders Review show the proportion of women in senior Leadership roles continues to rise across the FTSE 350, even in hard-hit sectors. There has been a 3.4% increase in women in Leadership in the Travel & Leisure industry, and similarly a 1.7% increase in Retail sector. Furthermore, progress on boards have seen even greater increases, at 5.4% and 3.7% respectively.

It is positive to see this continued upward trend and whilst there is clear evidence on the disproportionate impact on women's careers, there are many opportunities for organisations to improve women's representation as a result of the pandemic. Businesses must now redouble their efforts and review short, medium and long term strategies for enabling women's talent at the top table to ensure that these hard won gains are not lost.

Insights into the impact of the pandemic on women have been sourced from recent research from the Global Institute for Women's Leaders at King's College London¹², Pearson Plc¹³ and The British Retail Consortium.¹⁴

Despite women making up only 48% of the workforce, of the 15 million people furloughed, 52% were women

Around 1 in 4 women aged 50-64 have caring responsibilities for older or disabled loved ones

81% of employees expect to be able to undertake hybrid working versus 29% pre-Covid

Opportunities for sustaining diversity gains for women and business in post-pandemic recovery

Embracing Flexible Working

Reviewing location and working patterns has proven to be effective and should no longer be a barrier for progression. Companies must ensure that choice of flexible working does not result in unequal support or opportunities.

Rebuilding the Workforce with Diverse Candidates

Redoubling efforts to attract and retain diverse candidates is crucial for business when having to adapt to rapidly changing customer expectations.

Reviewing Parental Leave and Childcare

As caring responsibilities are increasingly shared between both parents, policies, practices and ways of working must adapt alongside.

Inclusive Leadership

Managing remote teams inclusively will be critical to women's progression and should move towards assessment of performance and management based on outputs and results over presenteeism.

Accelerating Change

As organisations have proven the ability to adapt quickly to changing circumstances and priorities, this should be channelled with a lens on diversity to create more opportunities for all.

Johan Lundgren
Chief Executive Officer
EasyJet Plc

The pandemic was a crisis like no other in aviation's history, unimaginable in so many ways. It changed the way we travel - even making it illegal for a time - paused our growth and with it our ability to recruit and has changed the way all of us work forever. And while the challenges are immediately evident, the opportunities seem much less apparent, but they are there. As we emerge from the pandemic, I am confident that progress has and will continue to be made.

One thing is for certain, it has been incredibly tough for our people who have shown huge resilience and determination. We have had a focus on internal promotion for some time and so I am very proud that we have not only managed to maintain the proportion of women on our board but that in the middle of the pandemic were able to make an internal promotion to the board making Sophie Dekkers our Chief Commercial Officer. Two of our top three leadership bands are already over 30% women and by focusing on internal succession we can ensure more of our women continue to grow and progress within easyJet.

I see the benefits of having a diverse Board every day because it provides a range of perspectives which support good decision making, while creating a positive culture. But the boardroom is not the only place we must continue to focus on.

The gender imbalance in the pilot community is one of the most long-standing and deep-rooted challenges the industry faces and one which we have been pro-actively tackling. easyJet has long championed more diversity in the cockpit and challenged the gendered stereotypes of this career. When the pandemic struck we wanted to preserve the progress we had made and two years in, I am really pleased that we have managed to retain the majority of new women recruits and will continue efforts to get more diversity into the cockpit. We have recently launched advertising which highlights the extraordinary breadth and depth of skills our pilots have to attract more diverse candidates and show that pilots can be found in all walks of life.

Continuing to create an inclusive and energising environment has been crucial, as has a focus on wellbeing and inclusion in equal measure. Our approach to hybrid working and flexibility into our daily routines has also supported our commitment to inclusivity.

In my view, creating an inclusive environment to support diversity is not only the right thing but also means a more sustainable and better performing workforce which in turn helps easyJet to remain an attractive employer and succeed.

easyJet

4. Women on Boards

4. Women on Boards

FTSE 100¹⁵ Progress 2021

Almost half of all FTSE 100 companies have 40%, or more women at the board table. A new career opportunity has opened for senior women in the later stages of their careers, which a decade ago was largely unattainable, and this is to be celebrated.

The FTSE 100 now stands at **39.1%** up from 36.2% last year. There are 414 women serving on FTSE 100 Boards out of a total of 1058 directorships.

The key drivers of progress are the turnover rate and the appointment rate of women. The turnover rate remains similar to previous years, but for the first time there has been a step change in the appointment rate of women which is nearing parity at 47%. This will deliver faster progress in those companies with some way to go to meet the new 40% target. It is also an important indicator that the skills and experience of women are becoming more equally valued, and the selection process is extending beyond known, traditional business and social networks.

The number of women in most senior board roles continues to increase, with 16 women Chairs and 32 women occupying the Senior Independent Director role. Nearing half of all FTSE 100 Boards now have a woman in either the Chair or Senior Independent Director roles. However in a familiar theme and one of the final hills yet to climb, the number of women in the CEO role remains flat, and stubbornly low.

The majority of FTSE 100 boards have met and exceeded the 33% target. Following a strong increase in the final year of the Hampton-Alexander Review, overall 17 boards have increased their representation of women this year and met the 33% target. Only 15 boards remain below the 2020 target.

The increase in women's representation on FTSE 100 boards is significant, arguably revolutionary in just a decade, and a major achievement for British business. The All-Male Board is of the distant past, the tokenistic approach of the 'One & Done' Board is following suit, and women Chairs once a rarity, are now commonplace.

15. All FTSE 100 Women on Boards data as at 10th January 2022, unless otherwise specified.

FTSE 100 Journey to 33%

The majority of appointments are as Non-Executive Directors naturally, given the UK's corporate governance structure, where approximately 80% of roles on FTSE boards are in a Non-Executive Director capacity. The work of these next few years is to make more serious inroads to the representation of women in the CEO and Finance Director roles, which usually sit on the board. Meanwhile, a new career path at the board table, in the past largely unavailable to women, has opened up as a later stage career opportunity.

The complete FTSE 100 Company Ranking can be found on page 48.

Women Board Members by Company

The number of companies in the FTSE 100 that have four, five or more women around the board table, continues to grow each year. With the average board size nearing 11 members, gender-balanced boards are fast becoming the 'norm'. The compounding benefits of more than three women around the table are well researched, with women's contribution valued in its own right, and as compared with that of women peers, as well as with men.

The Highs

Diageo Plc remains in the top slot for a second year, with 60% women on their board, followed by Auto Trader Group, who have moved up from fourth place, into second place

Top Ten Best Performers

Rank	Company	Women on Boards	Sector
1	Diageo Plc	60%	Food, Beverage & Tobacco
2	Auto Trader Group Plc	55.6%	Technology
3	Land Securities Group Plc	55.6%	Real Estate
4	3i Group Plc	55.6%	Financial Services
5	Burberry Group Plc	54.5%	Consumer products & Services
6	Admiral Group Plc	54.5%	Insurance
7	Rightmove Plc	50%	Real Estate
8	Halma Plc	50%	Industrial Goods & Services
9	Severn Trent Plc	50%	Utilities
10	abrdn Plc	50% ¹⁶	Financial Services

this year. Unique in the history of the FTSE 100, there are now six companies with a majority of women on their board. A further ten companies have 50% women on their boards.

The Lows

It is over a decade since the Davies Review set out expectations and a route-map for FTSE companies to increase the representation of women at the board table. It is disappointing to see some of the same names appear year after year, and two companies adrift from even the Davies 25% target to be achieved by 2015.

Ocado Plc, surprising for a British food retailer is here for the second year running, however along with Antofagasta, they have made progress. EVRAZ Plc have dropped back to just 16.7%.

Top Ten Poorest Performers

Rank	Company	Women on Boards	Sector
1	EVRAZ Plc	16.7%	Basic Resources
2	BHP Group Plc	20%	Basic Resources
3	Ocado Group Plc	25%	Personal Care, Drug & Grocery Stores
4	Smith & Nephew Plc	27.3%	Health Care
5	Berkeley Group Holdings Plc	28.6%	Consumer Products & Services
6	Antofagasta Plc	30%	Basic Resources
7	St. James's Place Plc	30%	Financial Services
8	Hikma Pharmaceuticals Plc	30%	Health Care
9	United Utilities Group Plc	30%	Utilities
10	Sage Group Plc	30% ¹⁷	Technology

The entry level criteria for the Top Ten Poorest Performers table has risen to 30% this year. However, several companies which in 2020 met, or exceeded the 33% target, including BHP Group Plc, Smith & Nephew, Compass Group, Standard Chartered, Sage Group and St James' Place Plc, have all fallen back during the year. All clear indicators that progress takes a while to embed, and can be fragile.

16. There are a further 6 companies with 50% Women on the Board, they are M&G Plc, Schroders Plc, Royal Dutch Shell Plc, Kingfisher Plc, Taylor Wimpey Plc and SSE Plc
17. There is one further company with 30% Women on the Board, which is Whitbread Plc

FTSE 100: 40% Women on Boards Target Met

It is encouraging to see 48 companies in the FTSE 100 who have already met, or exceeded the new 40% target for Women on Boards

I believe passionately that a diverse and inclusive culture is a strategic imperative, and at Pennon we treat it the same way as we do each strategic priority - setting the tone from the top, holding leaders accountable and delivering against a clear action plan.

We welcome the FTSE Women Leaders Review. Measurement, time series and benchmarks are essential tools. We see the impact of the pandemic globally increasing already uneven work equity gaps, with women and those with ethnic backgrounds impacted most. Given this, businesses in the UK must act to avoid reversing progress of recent years. We all have more to do.

We know that balanced teams are better at solving complex problems, delivering innovative solutions, spotting new opportunities, as well as being a powerful driver of resilience.

Speaking as one of only four companies in the FTSE 350 to have a woman Chair and CEO - Susan Davy and I both hold a firm view - if ever there was a time for us to act collectively, that time is now.

Gill Rider
Chair
Pennon Group Plc

More women at the board table each and every year

FTSE 100 Women on Boards

Over 70% of FTSE 100 companies now have four or more women around the board table. Only three companies have two or less women today, compared to 42 companies with two or less women around the board table in 2015.

4. Women on Boards

FTSE 250¹⁸ Progress 2021

Another strong year for women on FTSE 250 Boards, with the gap between the FTSE 100 and FTSE 250 progress narrowing, and the number of tokenistic 'One & Done' Boards having for a fifth consecutive year, with only six remaining across the FTSE 350.

The FTSE 250 now stands at **36.8%** up from 33.2% in 2020. There are 724 women serving on FTSE 250 Boards, out of a total of 1970 directorships.

This represents an increase of approximately 12 percentage points in the last three years, an additional 227 women appointments and clear evidence the UK's voluntary business-led initiative to improve gender balance on the boards of public listed companies, is working.

The key drivers of progress are the turnover rate and the appointment rate of women. The turnover rate remains similar to previous years. However, as evidenced with the FTSE 100, there has been a step change in the appointment rate of women, which has increased for a third year running to 45%, and near parity.

The gap in women's representation on FTSE 100 Boards, and that of FTSE 250 has also narrowed recently. In 2015 the FTSE 100 stood at 26.1% and the FTSE 250 at 19.6%, a gap of 6.5 percentage points. This year that gap has reduced to a difference of 2.3 percentage points only.

The number of women in most senior board roles continues to increase, with 32 women Chairs and 83 women occupying the Senior Independent Director role. However, the number of women in the CEO role, in a continuing and similar theme, has remained largely flat over time.

Most FTSE 250 Boards have met, or exceeded the 33% target, with 41 more boards having reached the target during 2021. However, there are still 57 boards with some

FTSE 250 Journey to 33%

way to go to meet prior year targets and six boards with one lone woman around the table.

There are 14 FTSE 250 companies with a majority of women on their boards, and a further 20 companies with 50% women. In total there are 92 companies in the FTSE 250 with 40% or more, women on their boards.

The complete FTSE 250 Company Ranking can be found on page 52.

18. All FTSE 250 Women on Boards data as at 10th January 2022, unless otherwise specified
19. The six remaining 'One & Done' boards are: ContourGlobal Plc, Redde Northgate Plc, JPMorgan Japanese Investment Trust, Tritax Eurobox Plc, JPMorgan European Discovery Trust Plc and Smithson Investment Trust Plc.

The number of companies in the FTSE 250 that have four, or more women around the board table continues to grow. With the average board size approaching eight members, so smaller than the FTSE 100, but with three plus women now emerging as the 'norm'.

The Highs

This year Moneysupermarket.com Plc take the top slot with an increased 66.7% women on their board, followed closely by Ascential Plc, featuring in the Top Ten for five consecutive years. International Public Partnerships are the highest Investment Trust featured, followed by eight companies all at 60% women on their boards.

Investment Trusts not only dominate the Top Ten Best Performers list, they also make up around half of the 92 FTSE 250 Boards already at 40%, or more women.

Amongst those most improved in the year are AJ Bell, Ferrexpo, 4imprint Group, Invidior and Aston Martin Lagonda Global Holdings Plc.

Top Ten Best Performers

Rank	Company	Women on Boards	Sector
1	Moneysupermarket.com Group Plc	66.7%	Technology

10	Scottish American Investment Company Plc	60% ²⁰	Financial Services

Women Board Members by Company

The Lows...

However, not all companies have moved forward in the year. There are 14 FTSE 250 Boards that had reached the 33% target this time last year, but have since fallen back. These include Weir Group Plc, Chemring Group Plc, Bodycote Plc, Capita Plc and Trainline Plc.

ContourGlobal occupies the bottom slot, with only 11% women on the board for a second year running. Premier Foods with 20% and Vivo Energy Plc at 22% are also unchanged in the year and in the 'Top Ten Poorest Performers' of FTSE 350 Boards.

JPMorgan Japanese Investment Trust Plc is the lowest ranked of all 71 Investment Trusts with 20% women on the board.

As the 33% target is now a year overdue, and in general there is much more progress still to be made for women in Leadership, the priority measure for the FTSE 100 and FTSE 250 company rankings has this year shifted to Leadership roles. However, a 'gating' threshold has been introduced where the Board has not met the 33% threshold, they fall into a separate and lower tier for ranking purposes. Further information can be found on pages 48 to 62.

Further information can be found on pages 48 to 62.

4. Women on Boards

UK Progress Compared Internationally

The UK ranks higher than ever this year in second place behind France, when compared internationally to other countries working hard to improve the gender balance on the boards of public listed companies. The success of the UK voluntary business-led approach sets a clear example and should encourage those countries just beginning.

Compare and Contrast

The FTSE 100 sits in second position when compared to peer countries similarly working hard to increase the number of women on the boards of their biggest listed companies.

This achievement is of greater significance given that several of these countries began their efforts earlier than the UK, have had quota legislation in place for many years, and are measuring progress against a much smaller number of companies than the UK.

When measuring progress across the FTSE 350 group of companies, the UK would still be in third place between Norway and Sweden.

Many countries now have formal frameworks in place to address the shortfall of women on the boards of their public listed companies. Whichever the chosen route, the UK model now provides considerable evidence that the voluntary, business-led approach works, and at scale. This should encourage other countries that are just beginning.

Tracking international progress beyond Boards

Few countries are yet to make meaningful inroads on measuring progress below board level, however, both France and the Netherlands have recently introduced new legislation to address this.

For large companies, France has introduced new quotas of 30% women executives and in management positions by 2027, increasing to 40% by 2030.²¹ The Netherlands similarly now requires large companies to set ‘appropriate and ambitious’ targets to improve the gender diversity on their boards, and crucially, their senior management teams.²²

As it stands today, the UK sits comfortably ahead in terms of ambition and progress, in particular as the UK’s approach is a voluntary one, and targets were set for women in Leadership almost five years ago. However, measuring progress internationally in Leadership teams remains challenging and an increase in the number of countries against which to compare, would be welcome in future years.

2021 Performance Compared

Country		Number of Companies in Index	Quota or Voluntary	Total Directorships	Total Women on Board	% Women 2020	% Women 2021
France	CAC	40	Quota	584	256	43.8%	43.8%

Executive Search and Benefits of Virtual Recruitment for Diversty

The appointment rate on FTSE 350 Boards is nearing parity, with over 45% of all available roles going to women in the year. The contribution of many in the search community has been pivotal to progress, with virtual recruitment offering advantages.

Enhanced Code of Conduct

The Enhanced Code of Conduct offers a performance-based accreditation process, focussed on the appointment rate of women and men, and best practice criteria, which recognises those executive search firms doing most to support gender equality on FTSE 350 Boards.

The 12 firms in the table below are all accredited under The Enhanced Code of Conduct for 2021, each having met the performance criteria set out below, and best practice standards in gender-balanced selection for FTSE 350 Boards in the last 12 months.

- At least 40% of all FTSE 350 Board appointments have gone to women.
- At least 4 women have been appointed to FTSE 350 Boards in the 12 month period and there is a proven record of helping women achieve their first board appointment.

The search firms working with smaller FTSE listed companies, large privately owned, Government or Not-for-Profit Boards, are also recognised below in a separate 'Beyond FTSE 350' category.

Virtual Recruitment

The pandemic has accelerated a change in working circumstances and for some people, this has been a change for the better. From a recruitment perspective, the use of technology has helped access a more diverse talent pool, enabled women to cross borders and find positions on boards that otherwise would not have been on offer, and the widespread use of hybrid working, appears to prove location less important than previously thought.

A summary of feedback gathered from the executive search community at the end of 2021, shows clients and search firms adapted quickly to the challenges of the pandemic, and have reflected a range of benefits in their board and leadership recruitment process over the last two years. Many benefits are anticipated to be here to stay, but other changes may have consequences that both the search firms and their clients need to be alert to.

The Benefits

- **More time & speed:** Time gained through less travel and easy, quick and flexible access to virtual meetings, has made for a more efficient process. It has also opened up a wider pool of candidates who have more availability for meetings and to take on additional commitments.
- **Momentum:** A clear and structured virtual approach, combined with added time efficiencies has created a greater sense of momentum, and increased accountability on clients to manage their side of the process and stakeholders more quickly.
- **Unconscious bias:** Virtual candidate interviews have helped in 'levelling the playing field' by mitigating the effects of unconscious bias. There is a greater need for focus and preparation virtually, with interviewers less influenced by physical characteristics like height or a firm handshake, and the outcome more based on ability and potential.
- **Less intimidating process:** Clients are more relaxed and informal in their home 'safe' space, which helps in the initial relationship building, later consolidated with in person meetings, in more relaxed settings, such as socially distanced walks.

- **More equal contribution:** Easier to make oneself heard in a virtual setting with a good Chair who ensures everyone has a chance to contribute. The 'protocol' of virtual meetings lessens the tendency for some people to talk over others, often to the benefit of women.
- **Trusted relationships:** Longstanding client relationships have continued through the pandemic, as clients valued the 'short cut' and established understanding of their companies, culture and needs, and facilitating a longer-term, more holistic view on succession planning.
- **Locations & loyalty:** People have become more willing to consider new and different locations, and appointing international candidates has become more viable. Women can be overly loyal and stay in roles too long, virtual work has made it easier to take the leap.
- **Diverse hiring teams:** Virtual processes enhance both search firms and client's ability to put together diverse hiring teams which can more objectively assess candidate potential and keep each other accountable to ensure the process is inclusive.

The Drawbacks

- **Few in person meetings:** Candidates may not have met in person the people they will be working with until joining the company. This has made onboarding new directors difficult, combined with reduced opportunities for site visits. Similarly search firms may not have had the opportunity to meet candidates.
- **Less networking opportunities:** Easier to maintain existing relationships than establishing new ones, with casual opportunities for running into potential candidates much reduced in the absence of networking events.
- **Transactional nature:** Shorter quicker meetings, that get to the point can feel too transactional in nature. Interviewers need to work harder to put the candidate at ease, demonstrating undivided attention, and offering a two-way discussion rather than firing questions.
- **Less committed to process:** Candidates are more comfortable to join a virtual meeting than they were to go for an interview. The downside being that having committed less to the process at earlier stages, the dropout rate is higher.

Going forward, flexible, hybrid processes, the mixing of in-person and virtual interviews seem here to stay. However, striking the right balance will be key.

Our special thanks for contributions to this feature from Russell Reynolds, Ridgeway Partners, Spencer Stuart, Warren Partners, Heidrick & Struggles, Fidelio Partners and Sapphire Partners.

We expect that, much like hybrid working, hybrid interview processes are here to stay.

Agility is not a substitute for rigour and quality of process, but smart boards are now incorporating some virtual interviews as standard, to help them run an efficient, inclusive and timely process.

Louise Angel
Ridgeway Partners

5. Stakeholders

Increasing Investor Expectation

The robust and collective action of Investors in recent years has been a significant contributor to progress, and it looks set to continue. Investment managers are firm in the belief that diverse boards make better decisions.

Continuing Investor pressure

Investor pressure is on for companies to maintain and build on progress on gender diversity at the board level, leadership teams and throughout the workforce. Significant progress is still required by some to meet and maintain all the former targets set by the Hampton-Alexander Review. Investors want to ensure that progress does not stagnate and a culture of diversity continues to be embedded in boardrooms. Shareholders are looking for companies to go beyond the 33% threshold, and further increase the diversity of their boards and leadership teams.

Why it matters

Investment Managers are firm in the belief that companies which embrace gender diversity can expand their access to talent, command the trust of their customers and key stakeholders, and have the tools to be more innovative and make better business decisions. They are better equipped to deliver long term sustainable returns for investors.

Investment Managers consider a wide range of Environmental, Social and Governance risks and opportunities when assessing the long-term value of their investments. As stewards of their client's capital, they also engage with companies to support and challenge them to better identify, communicate and manage these risks.

Diversity is a universal governance consideration for every business and therefore a key driver for investors' engagement with companies. Investors want to understand not just how companies will meet the public targets, but how they are cultivating a diverse and inclusive workforce and a pipeline of talent that will ensure the business thrives in a modern economy.

Expectations

This is no new expectation. While progress on board diversity has been encouraging, there remains significant room for improvement in developing the pipeline of talent that forms the bedrock of a company's future success. Investors are looking closely at diversity of the whole workforce and want to understand the efforts that are being made to improve. While investors recognise the time it takes to address complex barriers such as

unconscious bias, and to reap the benefits of investing in change, those companies that are making progress too slowly are increasingly finding they are at the sharp end of shareholder voting rights.

Voting and Action

Investors are increasingly using their voting rights to hold companies to account on diversity where they are seeing little progress. The Investment Association's Public Register details companies in the UK FTSE All Share that have received significant opposition (of 20% or more) by shareholders to a resolution. In 2021, 8 companies in the FTSE 350 noted in their AGM results statement that they had received significant shareholder votes against Director re-elections due to a lack of diversity on the board and in leadership teams.

The IA's research service, the Institutional Voting Information Service (IVIS), provides independent information on listed companies to help shareholders reach a decision on how to vote at AGMs. This year, IVIS will continue to increase the pressure on those companies making poor progress on gender diversity – issuing a red top, the highest level of warning for those companies with 33% or less of Women on Board and 28% or less of the Executive Committee and their Direct Reports.

Managing into the future

The importance of gender diversity has not waned as a result of COVID, or the growing attention on climate change. On the contrary, businesses have needed to adapt to new ways of working, changing consumer demand and an uncertain future.

Diversity of thought has been essential to navigate this challenge and ensure the resilience of business models as they adapt to crises. Diversity will be essential to managing sustainability challenges such as climate change. In navigating the new normal, diversity of thinking has become even more vital to long-term value.

Michelle Scrimgeour
Chief Executive
Legal & General Investment Management

We have come such a long way since I started my career in the City. I remind myself of that when I look around and see that we still have further to go in all aspects of diversity and inclusion.

As the Chief Executive of Legal & General Investment Management (LGIM), I have a fantastic management team who are 50% female. This is important to me because in my career I've witnessed the benefits of more balance in a workforce (different perspectives, wider talent pools, stronger innovation) and I've seen what women as individuals can bring. I believe that we should try to lead by example and so I'm proud that at LGIM, we have successful and thriving colleagues as role models: I try my best to be one of them.

As a company, it's also important that we're playing our part in changing culture in an industry that has traditionally been viewed as male dominated. We all know that culture is critical, or diversity and female inclusion just won't thrive.

There has been real progress in normalising and celebrating gender diversity in senior leadership roles in recent years.

However, I'm impatient for more and see the following actions as critical in taking us further, faster:

- We need to galvanise investors to use their voting powers to press for this change with a two-pronged benefit – gender representation and increased accountability. The power of investor action and voting cannot be overestimated.
- Executive teams need to learn how to apply fresh, holistic thinking to their working and hiring structures to remove barriers that inadvertently block women's progress through their senior leadership pipelines.
- Data disclosure should be a priority for all listed companies given its importance in the market. We must establish robust and transparent data as it is used to set aspirational targets against which to improve, but also to build voting and engagement policies.

How we continue to tackle change requires further debate and collaboration. Through engagement with policymakers and regulators, investors can bring pressure to bear that will help us to go faster in securing futures for women in leadership roles. In my view that is not only good for women in the workplace, it is also good for business.

Alison Platt CMG

on behalf of the Steering Group

As we look forward to the next, and potentially final, stage of the Review its both a time for reflection and renewed focus.

The work of the Review has always been anchored by two critical elements – data and choice. Fundamental to the success of the Review has been the willingness of UK business leaders to engage in sharing the facts - from representation to pay - and to pick up the baton for change willingly, and without the need for legislation. This makes the achievements to date all the more valuable and a greater cause for celebration. It also suggests that the change is embedded and the face of boardrooms around the UK will forever see gender balance as ‘normal’.

But to assume the work of the Review is done, would be a mistake. A shift in focus to women in Executive Committee roles, and ensuring the very best talent regardless of gender to lead the UK’s recovery, is fundamental to a stronger and better economy for all. That challenge is different and arguably harder. The opportunity to select a new CEO or CFO may come along perhaps only once or twice in the life of the board charged with making the appointment. The development of credible and able candidates inside an organisation calls for a deep and well-executed approach to talent management, and for today’s leaders to double down on efforts to bring women through the ranks.

This year’s report also reflects the impact of Covid on our lives. Remote working, home schooling, self -isolating and the sudden shock of a closed down economy laid a heavy burden on many. While it’s encouraging to see the number of women in Leadership roles increase this year, post the pandemic the world of work is changing. We are yet to see what the reality of ‘hybrid’, ‘remote’ or ‘four- day week’ working patterns bring to women’s progression. Vigilance will be key.

An enduring characteristic of the Steering Group has been its fervent debate about how best to move forward – anchor the wins, push the boundaries and shine a light on the champions leading the way. As we move into a new phase, the progress made must be seen as fuel in the tank for the next big push. The higher targets set out today bring clarity to the goal but rely heavily on our ability to share best practice, to agitate for change where needed, and to let the data speak for itself – loudly and publicly.

The next few years offer an incredible opportunity to rebuild our economy and have business lead the way in creating a talent-led recovery. Ensuring women play a full and equal part in that is incentive enough to continue the work of the last decade.

Source: Women on Boards Data 10th January 2022, BoardEx and other public and/or statutory sources.

I am very proud to work with Pershing Square Holdings’ diverse board. Diverse teams are more likely to solve problems and innovate. I have seen how varied experiences have added significant value to our board discussions.

Today’s challenge is how to recruit, train and retain a genuinely diverse workforce so their skills influence all organisational levels. We need to acknowledge the unconscious bias of senior executives in hiring, and broaden recruitment to give candidates with non-traditional backgrounds opportunities.

Cultural changes may be required so women and employees from diverse backgrounds feel welcome and able to progress. Companies need progression and retention programs to ensure diverse candidates get advice and training to succeed, and ultimately attain senior executive and board roles.

I don’t underestimate the difficulty of implementing some of these changes, but I am optimistic that companies will make the investment, not only to meet corporate or boardroom targets, but because it is good for business to do so.

Anne Farlow
Chair
Pershing Square Holdings Ltd

“Real change, enduring change, happens one step at a time.”

“So often in life, things that you regard as an impediment turn out to be great, good fortune.”

“Reading is the key that opens doors to many good things in life. Reading shaped my dreams, and more reading helped me make my dreams come true.”

Ruth Bader Ginsberg
1933 - 2020
US Supreme Court Justice, and forceful advocate for women’s rights and workplace equality.

KPMG Connect On Board

KPMG launched Connect On Board to encourage the business community to create greater diversity on boards. Connect On Board is an online platform designed to connect non-executive director (NEDs) candidates from a diverse talent pool with organisations seeking to build better boards. From the outset the vision for Connect On Board has been to help increase the visibility of first class executives who are ready for NED positions.

If you are seeking a NED or looking for a NED role, visit www.kpmgconnectonboard.com and register your interest via the home page.

Part of the KPMG Board Leadership Centre
